Operationalizing
Sustainable
Development

Module 2

Transforming
Operations I

Module 3

Transforming
Operations II

Module 4

Building a
Sustainable
Legacy

Module 5

Sustainability
Transformation
& Sustainable
Resolutions

About the Course

This course is designed for leaders and executives in businesses / organizations who are interested in learning more about improving their Environmental, Social, and Governance (ESG) performance and re-aligning their business / organizational/unit goals with the aspirations of Sustainable Development as set in the 2030 Agenda for Sustainable Development. It is also suitable for business/organization representatives who plan to initiate change in their respective organizations towards more sustainable business / organizational approaches and decision-making.

Course Highlights

1. Effective application of Sustainable Development in enriching organizational ESG performance.
2. Understanding the power of effective stakeholder management in transforming business and organizational operations.
3. Guide to managing resource consumption and environmental impacts in the path towards operational transformation.
4. Assessing direct and indirect impacts from products and services and initiating change to transform the value of outputs.
5. Important lessons in overcoming challenges in building and maintaining a sustainable business.

Course Deliverables

- Live course access
- Complete module
- Resource access
- Digital certificate

Course Benefits

1. Gain awareness on the risks of sustainability inaction, the potential impacts from businesses and organizations' operations, and learn more about its effective management.
2. Gain comprehensive knowledge on the roles and functions of business and organizations in fulfilling ESG requirements and contributing towards the 2030 Agenda for Sustainable Development.
3. Gain valuable insight on the correlation between effective sustainability performance (including ESG) and positive business and organizational performance.
4. Gain knowledge and competency in the application of sustainable approach and practices to improve the business and organization's sustainability performance.
